EDUCATION

2010—2014
University of Derby
BSc (hons) Computer Games Programming.

SKILLS

Programming: C/C++, C#, Java, JavaScript, Rust, Python
Software: Git, SVN, Docker

CONTACTS

Email: blindrabbits@gmail.com
Mobile: 07960 725479

REFERENCES

Available on request.

PROFILE

I have had a keen interest in computers and programming since high school and have almost always had some sort of project on the go. Plenty of experience with many different languages, I find picking up new ones is fairly easy.

WORK EXPERIENCE

SOFTWARE DEVELOPER | VIRTALIS **(2014-2022)**
Developed high performance visualization software for CAD and geographical data.

- C, C++, C# and Javascript (using React), as well as Docker, Kubernetes and Azure Dev Ops.
- Implemented VR headset support.
- Implemented support for finger tracking hardware, as well as algorithms for manipulating objects.
- Helped develop a complex helicopter rescue simulator.
- Experience working with WFS and other geographic data sources.
- Helped design and worked on a distributed, cloud based web-app in C# developed from scratch using a microservice architecture.

SOFTWARE DEVELOPER | PILLOWDRIFT **(2012-2013)**
Started by myself and 3 other students during our sandwich year at university. Developed and released two games:

- Mega Driller Mole, written using libGDX (Java) for android.
- Stellar Swing, Unity (C#) for android and PC.
- Also the prototype of a rocket dodging game in Unity (C#).
